

n8n + Amazon Bedrock Insurance Claim Analyzer Demo Guide

Step 1: Create AWS Free Tier Account

Go to <https://aws.amazon.com/free/> and create a free AWS account. Complete email verification, phone verification, payment verification, and select the Basic Support Plan.

Step 2: Open IAM

In the AWS Console, search for IAM and open the IAM Dashboard.

Step 3: Create IAM User

Navigate to Users → Create User. Create a user named n8n-admin.

Step 4: Grant Administrator Access

Choose 'Attach policies directly' and attach the AdministratorAccess policy. Create the user.

Step 5: Open User Security Credentials

Open IAM → Users → n8n-admin → Security Credentials.

Step 6: Create Programmatic Access Keys

Under Access Keys, click Create Access Key. Choose 'Third-party service' and continue.

Step 7: Download CSV File

Download the CSV file containing the Access Key ID and Secret Access Key. Save it securely.

Step 8: Open Amazon Bedrock

Search for Amazon Bedrock in the AWS Console and open it.

Step 9: Verify Claude Availability

Select region us-east-1 (or supported region). Open Model Catalog and verify Claude 3 Haiku is available.

Step 10: Create n8n Account

Create an n8n Cloud account and start a new workflow.

Step 11: Add Form Trigger

Add the 'On new n8n Form event' trigger. Configure the form title and description.

Step 12: Add Form Fields

Create fields: Customer_name (Text), Claim Amount (Number), Claim_type (Text).

Step 13: Add AI Agent

Add an AI Agent node and connect it to the Form Trigger.

Step 14: Configure Prompt

Use: You are an insurance fraud analyst. Customer Name: {{\$json["Customer_name"]}} Claim Amount: {{\$json["Claim Amount"]}} Claim Type: {{\$json["Claim_type"]}} Analyze the claim and provide: 1. Risk Level 2. Fraud Indicators 3. Recommendation 4. Confidence Score Keep response under 120 words.

Step 15: Add AWS Bedrock Chat Model

Connect an AWS Bedrock Chat Model to the AI Agent.

Step 16: Configure Bedrock Credentials

Create credentials using the Access Key ID and Secret Access Key from the downloaded CSV. Select region us-east-1.

Step 17: Select Model

Choose Model Source = On-Demand Models and Model = Claude 3 Haiku.

Step 18: Test Workflow

Execute the workflow, open the form URL, submit a claim, and review the AI-generated risk assessment.

Final Architecture

Customer Form ↓ n8n Form Trigger ↓ AI Agent ↓ Amazon Bedrock (Claude 3 Haiku) ↓ Risk Assessment
